A problem solver and great communicator, eager to prove my value in an emerging company. Motivated to advance and expand my skill set through team collaboration and challenging projects.

EXPERIENCE

ProAutomated, Inc. | New York, NY — Field Service Engineer

JUNE 2019 - MAY 2022

Completed a multitude of Lutron system startups ranging from small-scale Standalone systems to building-encompassing Quantum systems

Coordinated with on-site contractors and facility managers to ensure system is correctly installed and changes were made in accordance with tenant's preference

Trained end users on how to properly utilize Lutron devices and customize their system through a web-based system interface

Programmed and monitored client's industrial automated systems through PLC software such as Studio 5000 and EcoStruxure

Integrated with various contractors to provide impeccable support and keep projects within deadlines
